

Henry Park Primary School  
Primary 4 Science  
Weighted Assessment 2

Marks: \_\_\_\_\_ / 15

Name: \_\_\_\_\_ ( ) Class: 4 \_\_\_\_\_

Duration: 45 minutes

---

Question 1

- a) Fill in each of the blanks with a correct word.

A magnet has a \_\_\_\_\_ pole and a \_\_\_\_\_ pole. [1]

A magnet is strongest at its \_\_\_\_\_. [1]

Performance Task 1

You are given the following items.

- a magnet
- a metal bar

Use the items given to answer the following questions.

- b) Which of the following about the metal bar is correct? Tick (✓) the correct box. [1]

(i) Metal bar is not a magnet. It is made of a magnetic material.

(ii) Metal bar is a magnet.

(iii) Metal bar is made of a non-magnetic material.

- c) Explain how you arrived at your answer in (b). [2]

---

---

Question 2

- a) State what matter is.

Matter is anything that has \_\_\_\_\_ and occupies \_\_\_\_\_. [2]

Question 2 continued

b) Performance Task 2

You are given the following items.

- object X
- object Y
- a cup of water

Steps

- Put objects X and Y, one at a time, in the water.
- Observe what happens when each object is placed in the water.
- Record your observation in the spaces below.

(i) Object that floats in the water: Object \_\_\_\_\_ [2]

(ii) Object that sinks in the water: Object \_\_\_\_\_

(iii) The volume of the floating object cannot be measured using a measuring cylinder. Explain why. [1]

Question 3

Diagram 1 shows a measuring cylinder containing water. Diagram 2 shows the same measuring cylinder of water with a piece of stone placed inside.

**Question 3 continued**

- a) What is the volume of the water in diagram 1? \_\_\_\_\_ [1]
- b) What is the volume of the stone in diagram 2? \_\_\_\_\_ [1]

**Question 4**

Peter was investigating the strength of two magnets. He used a paper clip, a metre ruler and two magnets, P and Q. The diagram shows how Peter set up his experiment.

Peter measured and recorded the furthest distance at which magnet P was able to attract the paper clip. He repeated the investigation using magnet Q.

- a) State why the paper clip is attracted to the magnet. [1]

---

Based on his investigation, Peter concluded that magnet Q is stronger.

- b) Explain how Peter arrived at his conclusion. [2]

---

---

**End of Weighted Assessment 2**

**SCHOOL : HENRY PARK SCHOOL**  
**LEVEL : PRIMARY 4**  
**SUBJECT : SCIENCE**  
**TERM : 2025 WEIGHTED ASSESSMENT 2**

Q1	<p>a) A magnet has a North pole and a South pole. A magnet is strongest at its poles.</p> <p>b) ii)</p> <p>c) Bring both ends of the metal bar close to magnet and see which ends repels the magnet.</p>
Q2	<p>a) Matter is anything that has mass and occupies space.</p> <p>b) i) Y ii) X iii) The object cannot be fully submerged in the water.</p>
Q3	<p>a) 48m<sup>3</sup> b) 24m<sup>3</sup></p>
Q4	<p>a) The paper clip is made from a magnetic material.</p> <p>b) Peter put the paper clip further until magnet Q cannot attract the paper clip which is further than the furthest distance magnet P can attract.</p>
